

ImagePRO 4K

Don't leave home without one

Once you plug in the ImagePRO 4K and see how easy it is to scale, convert and switch, only one thought springs to mind: "ridiculously easy".

ImagePRO revolutionized live events in 2004 by making it easy to use multiple signal types and formats together. The ImagePRO 4K brings you the same peace of mind and adds features for the way shows are created in 2018.

It's not just complete, reliable and easy to use, it's ridiculously complete, reliable and easy to use.

Superb performance

ImagePRO 4K easily scales, converts and switches the highest quality signals (4K, 4:4:4, 60p, 10-bit). Enjoy inputs and outputs that offer:

- the highest resolutions (4K 60p)
- the best color performance (4:4:4 sampling, 10-bit colors).
- the lowest latency for a scaler of this class (1 frame, progressive)

The latest I/O connectors enable you to seamlessly convert HDMI 2.0, DP 1.2 and 3G-12G SDI. Put simply, the flexibility and power of the ImagePRO is the backbone on which you build shows that run without a hitch.

Road-ready and reliable

Like all Barco image processing products, the ImagePRO 4K is built for life on the road. Assembled and tested for extreme use and abuse, the ImagePRO performs just as well at the gig as it does in the shop. What's more, the live-source view on the front panel provides you with a clear view of the incoming signal giving you the confidence you need to execute your event flawlessly.

LED at your fingertips

Need to slice and dice LED signals? The ImagePRO 4K does it with ease. Either chop up single inputs across several connectors, or drive multiple walls from multiple sources. The LED set-up menu will guide you through the process to achieve pixel perfect images.

Why ImagePRO 4K?

- Best-in-class scaling
- Low latency
- Best ROI for your rental inventory
- Fastest source acquisition
- Familiar user interface
- Roadworthy design
- Proven history of performance
- Input and Output up to 4K60p

Features you'll love

- Populated from the factory with TCI and TCO
- 6x6 HD Scaling Matrix or converter.
- 2x2 4K60p Scaling Matrix or converter
- Front Panel, Web UI, and Event Master Toolset control
- Outputs and scalers configurable as HD, DL or 4K
- Up to 6x 4K still stores
- HDCP compliant
- Menus or Live source view on Front Panel Display
- Future support for embedded audio
